|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Introduction</b>   | <b>4</b>  |
| 1.1      | What is Game Theory? . . . . .                                    | 4         |
| 1.2      | Modelling Strategic Interaction . . . . .                         | 5         |
| 1.2.1    | Normal Form versus Extensive Form Representation . . . . .        | 5         |
| 1.2.2    | Complete/Incomplete vs Perfect/Imperfect Information . . . . .    | 11        |
| <b>2</b> | <b>Static Games of Complete Information</b>                       | <b>13</b> |
| 2.1      | Mixed Strategies . . . . .  | 13        |
| 2.2      | Iterated Deletion of Strictly Dominated Strategies . . . . .      | 14        |
| 2.2.1    | Dominated Strategies Considering only Pure Strategies . . . . .   | 14        |
| 2.2.2    | Dominated Strategies Considering Mixed Strategies . . . . .       | 16        |
| 2.2.3    | Problems with Iterated Deletion of Dominated Strategies . . . . . | 18        |
| 2.3      | Nash Equilibrium . . . . .  | 18        |
| 2.3.1    | Pure Strategy Nash Equilibrium . . . . .                          | 18        |
| 2.3.2    | Mixed Strategy Nash Equilibrium . . . . .                         | 21        |
| 2.3.3    | Comments on Mixed Strategies . . . . .                            | 23        |
| 2.3.4    | Discussion on Nash Equilibria . . . . .                           | 24        |
| 2.3.5    | Existence Theorems . . . . .                                      | 26        |
| <b>3</b> | <b>Dynamic Games of Complete Information</b>                      | <b>31</b> |
| 3.1      | Games of Perfect Information and Backward Induction . . . . .     | 31        |
| 3.1.1    | Backward Induction . . . . .                                      | 31        |
| 3.1.2    | Economic Applications . . . . .                                   | 34        |

|          |  |           |
|----------|--|-----------|
| 3.1.3    | Some Problems with Backward Induction . . . . .                              | 37        |
| 3.2      | Games of Imperfect Information and Subgame Perfection (Selten, 65) . . . . . | 37        |
| 3.2.1    | Subgame Perfect Nash Equilibrium . . . . .                                   | 37        |
| 3.2.2    | General Procedure to find SPNE in Finite Games . . . . .                     | 39        |
| 3.2.3    | Economic Application - Tariffs . . . . .                                     | 40        |
| 3.3      | Formal Definition of Strategy and SPNE . . . . .                             | 41        |
| 3.3.1    | Game Tree Representation, Strategy . . . . .                                 | 41        |
| 3.3.2    | Game Tree Representation . . . . .   | 42        |
| 3.3.3    | Strategies in Extensive Form Games . . . . .                                 | 43        |
| 3.3.4    | Equilibria in Extensive Form Games . . . . .                                 | 46        |
| 3.4      | Comments on Backward Induction and Subgame Perfection . . . . .              | 47        |
| 3.4.1    | Backward Induction . . . . .   | 47        |
| 3.4.2    | Subgame Perfection . . . . .   | 50        |
| 3.5      | Multistage Games with Observed Actions . . . . .                             | 51        |
| 3.5.1    | Repeated Games . . . . .   | 52        |
| 3.5.2    | Infinitely Repeated Games . . . . .  | 57        |
| 3.5.3    | The Rubinstein-Stahl Bargaining Model . . . . .                              | 64        |
| <b>4</b> | <b>Static Games of Incomplete Information</b>                                | <b>70</b> |
| 4.1      | Bayesian Game and Bayesian Equilibrium . . . . .                             | 72        |
| 4.1.1    | Example - Duopoly with Incomplete Information . . . . .                      | 73        |
| 4.1.2    | Example - Public Good with Incomplete Information . . . . .                  | 75        |
| 4.2      | Purification of Mixed Strategies . . . . .                                   | 76        |
| 4.3      | Mechanism Design and Revelation Principle . . . . .                          | 78        |
| <b>5</b> | <b>Dynamic Games of Incomplete Information</b>                               | <b>81</b> |
| 5.1      | Signalling Games and PBE . . . . .   | 83        |
| 5.1.1    | Example - The Beer-Quiche Game . . . . .                                     | 84        |
| 5.1.2    | Example 2 - Two Period Reputation Game . . . . .                             | 86        |
| 5.2      | More on Perfect Bayesian Equilibrium . . . . .                               | 90        |
| 5.3      | Equilibrium Refinements . . . . .  | 91        |
| 5.3.1    | Conditionally Dominated Actions . . . . .                                    | 91        |

|          |   |           |
|----------|---|-----------|
| 5.3.2    | Equilibrium Domination . . . . .                  | 93        |
| 5.3.3    | Intuitive Criterion (Cho-Kreps) . . . . .         | 93        |
| <b>6</b> | <b>Cooperative Game Theory</b>                    | <b>97</b> |
| 6.1      | Introduction . . . . .                            | 97        |
| 6.1.1    | Basic Issues in Cooperative Game Theory . . . . . | 97        |
| 6.1.2    | Games in Coalitional Form . . . . .               | 98        |
| 6.1.3    | Games in Partition Form . . . . .                 | 100       |
| 6.2      | Core . . . . .                                    | 100       |
| 6.3      | Shapley Value . . . . .                           | 102       |
| 6.4      | Cooperative Bargaining Theory . . . . .           | 105       |
| 6.4.1    | The Edgeworth Trade Example . . . . .             | 105       |
| 6.4.2    | Bargaining Problem . . . . .                      | 107       |
| 6.4.3    | Axiomatic Bargaining Approach . . . . .           | 108       |
